ASTRONOMICAL INSTRUMENTS.

By generous donation, G. B. DELAMATER, Esq., has furnished an excellent Telescope, 8 feet Refractor, 7½ inches Object Glass, in power capable of separating minute double stars; manufactured by A. Clark & Son, Cambridge, Mass. Also a superb Transit from the hands of Stackpole Bros., New York. These instruments are temporarily mounted, waiting the erection of a suitable observatory.

Also Sextant Transit, with Meridian Finder, Prismatic Compass, and other instruments essential to the department of ENGINEERING, all of first class workmanship, and practically used in the field.

APPARATUS AND CABINETS.

Through the munificence of Hon. C. V. CULVER, the College is now in possession of extensive cabinets of Mineralogy and Conchology, and complete Chemical and Philosophical apparatus, of the latest and most approved forms.

The apparatus for the most part, has been made to order by manufacturers having the highest reputation for skill in their special de-

partments. It comprises several hundred distinct pieces, affording the most ample means of illustrating every branch of physics and chemistry now taught in Collegiate Institutions.

Among the more expensive instruments are the following :

A compound Microscope, with accessories, manufactured by Zentmayer, of Philadelphia, at a cost of about \$500.

A Rumkorff Induction coil, giving a twelve inch spark, by E. S. Ritchie, & Co., of Boston, costing \$525.

A Thilorier's apparatus for solidifying carbonic acid.

Eighteen instruments to illustrate the laws of Undulations.

Auzoux' largest size Anatomical Models of the Eye, Ear, Brain, and Larynx.

Apparatus for reproducing Tyndall's experiments on Heat.

A Solar Microscope.

Two Polariscopes with accessories.

A Spectroscope with four prisms.

Apparatus for projecting optical phenomena on a screen, including a first class double lantern, adapted to four kinds of light.

The Optical Instruments, excepting the Compound Microscope, Telescope, and Astronomical Transit, were made by M. Duboseq, of Paris.

The laboratory is stocked with a full assortment of common chemicals, a cabinet of rare preparations, and an abundant supply of apparatus for all chemical purposes—the greater part of which has been imported from Paris and Berlin.

The cabinets embraces four distinct collections of minerals and shells.

1. THE PRESCOTT CABINET, comprising 2,400 specimens of marine, terrestrial and freshwater shells, and about 3,000 specimens of minerals and fossils collected and mounted by Dr. WILLIAM PRESCOTT, of Concord, N. H.

2. THE HALDEMAN CABINET has 550 excellent and carefully labeled specimens of minerals, and about 2,000 species of shells, and was purchased of S. S. HALDEMAN, of Columbia, Penn'a.

3. THE ALGER CABINET.—This magnificent collection, made

by the late FRANCES ALGER, of Boston, was purchased at the cost of \$12,000, and contains 5,000 specimens of minerals, remarkable for their beauty and variety, many of them unique. It embraces also a large number of duplicates, and a handsome suit of about 1,500 species of shells. This collection is said to have cost Mr. ALGER over \$35,000.

4. CABINET OF LITHOLOGY AND PALÆONTOLOGY.—Arrangements have been made with Prof. HENRY A. WARD, of the University of Rochester, for a Lithological and Palæontological cabinet of over 11,000 specimens, about 1,000 of which have been received. The *Megatherium Cuvierii* and six other large casts are mounted in the former chapel, which has been fitted up in elegant style for this Geological Museum.

A skillful Taxidermist has prepared some two hundred birds of New England, which have been received.

SMITHSONIAN COLLECTIONS.—In addition to several valuable collections heretofore received from the Smithsonian Institution there has been added a suite of over 500 specimens of land, marine and freshwater shells, from Panama, Vancouver's Island, and the West Indies, chiefly obtained by the late Prof. C. B. Adams, and authentically labeled by H. Cuming and by Dr. P. B. Carpenter, from the collections of D'Orbigny & Cuming.

These valuable additions will greatly increase the scientific advantages of the College and furnish special incentives to the study of Natural Science.

ENTOMOLOGICAL CABINET.—The Collections of the College have just been enriched by the receipt of a superior Cabinet of Insects, embracing 3,000 species, carefully and accurately catalogued and classified. It was arranged by W. O. Currier of Providence, R. I., and donated by a friend of the College,
